DETAILED ACTION

Election/Restrictions

1. Applicant's election without traverse of Group I, claims 1-13 in the reply filed on 1/11/05 is acknowledged.

2. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Claim Rejections - 35 USC § 112

- 1. Claims 10-13 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention.
 - a. Claim 10 states that pressure releases the dies; however, the specification states that the dies have to be cut with a laser first and then the pressure can release them.
 - b. The die picker is not shown in the drawing and does not appear to be part of the invented device. Claim 13 is not enabled by the disclosure.

Application/Control Number: 10/748,170 Page 3

Art Unit: 3723

1. Claims 10-13 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

- a. Claim 10 states that pressure releases the dies; however, the specification states that the dies have to be cut with a laser first and then the pressure can release them.
- b. In claim 12 what pierces the flexible wafer support? This method step must clearly recite the structure because this step is not evident from the drawings.
- c. Claim 13 recites a die picker but this does not appear to be part of structure of the support system.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- (e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.
- 3. Claims 1-3 are rejected under 35 U.S.C. 102(e) as being anticipated by Togawa et al (6852019).

Application/Control Number: 10/748,170

Art Unit: 3723

Togawa et al teach a method having a wafer support system (1), a vacuum chamber (22&25) which are at a lower pressure (col.13, lines 1-10), temperature control of first and second environements (col.10, lines 45-50), a perforated surface (figs.2&3)

4. Claims 1-13 are rejected under 35 U.S.C. 102(e) as being anticipated by Nonaka (6012509).

Nonaka teaches a method having a wafer support system (100), a vacuum chamber (106) which are at a lower pressure (col.7, lines 25-30), temperature control of first (102)and second environements (112 this is colder than the first temperature of at 102), a perforated surface (122), a flexible surface (110).

In regard to claims 10-13, the art is applied as best understood because applicant has recited parts that do not appear to be part of the invention the prior art is read on the claims with the same indefiniteness as the claims.

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Yadav et al and Sherstinsky et al disclose a device.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to LEE D WILSON whose telephone number is 571-272-4499. The examiner can normally be reached on M-F.

Art Unit: 3723

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, JOSEPH HAIL can be reached on 571-272-4485. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
